COMPANY

ABOUT US

Founded in 2004, EPC (Electrical Projects Contracting) began its journey by executing electrical networks, power systems, and substation works for private sector companies, including resorts and residential compounds. With a focus on technical precision and client satisfaction, the company quickly established a strong presence in the Egyptian electrical contracting market.

In 2014, EPC expanded its operations by registering with the General Authority for Investment (GAFI) and the Egyptian Federation for Construction and Building Contractors, enabling us to work with various governmental authorities and public sector projects.

EPC is officially registered under Commercial Registration No. 73006 and Tax ID No. 467-5-838, with the Egyptian Corporate Tax Authority.

We are proud to be a leading company specializing in medium and low voltage electrical networks and main power supply systems, executed in full compliance with both Egyptian and international standards and codes.

Our dedication to quality, safety, and timely execution is the cornerstone of our work. We implement strict HSE (Health, Safety, and Environment) protocols at all sites and maintain a highly skilled workforce of engineers, supervisors, and specialized technicians—ensuring that every project is delivered on schedule and to the highest standards.

OUR COMPANY INFORMATION

"We go beyond electrical contracting—empowering infrastructure through innovation, precision, and trust."
